

Amirkabir University of Technology  
( Tehran Polytechnic )

**To whom it may concern**

This is a recommendation letter for **Mr. Seyyed Jalaladdin Abbasi Koumleh** who has recently applied for a graduate studies program at your university. I have known him since 2016 when he was my students in the Mechanical Properties II course. He passed the course with a high score which placed him among the top 5% of his classmates. He was very active and challenging throughout the mentioned course.

His tough character makes him able to overcome obstacles as soon as possible and his perseverance and hardworking in predicaments leads him to stick to the work without any hesitations. His exemplary intelligence in challenging different issues with strong pieces of evidence and asking critical questions about the topic makes him able to perceive the concept of the lesson in an in-depth strong fashion. In this regard, he can always find a way to practice what he has learned in University so that he is able to handle the industrial projects when out of university. His exemplary creativity, as well as the powerful analytical mind in solving problems and decision making enables him to find the most efficient solutions in a most logical manner.

His English proficiency and the knowledge of working with different engineering software make him able to be up-to-date with the latest global scientific trends without any difficulties in communicating with his foreign peers.

Based on his personal and educational background, I have no hesitation to highly recommend him for any graduate education at your institute.

Sincerely,

*K. Dehghani*

Kamran Dehghani, Professor

Mining and Metallurgical Eng. Dept.

Amirkabir University of technology,

Tehran, Iran

**To Application office**

It is my pleasure to write this letter of recommendation for Mr. Seyyed Jalaladdin Abbasi Koumleh who is an applicant to your graduate studies program. Knowing him for about two years has given me a thorough perspective about his character since he was my student in the Powder Metallurgy course, and now he is my grading assistant in the Scientific English Language course.

He possesses an exemplary intelligence in analyzing data and elaborating logical reasons as to questions which are presented in class. Being so precise in coping with details, he was an excellent candidate to be my assistant in the Scientific English language course. His creative methods in developing solutions in an outstanding manner is also a paramount characteristic of him. Being industrious, cool-blooded as well as being tough in the counter of hardships, made him able to overcome the obstacles one after another.

I also would like to mention his innovation in work and his crystal-clear critical thinking ability. Being able to read, write and speak English with minimum difficulty enables him to use a vast number of assorted scientific sources which is a vital key to everyone's success.

I am sure, by proceeding the way he followed he will accomplish any given goal without any doubt.

Sincerely,

Dr. Nader Parvin

Associate Professor

Mining and Metallurgical Engineering Department
